E-Lites alternative to traditional cigarettes

by [Nikki Moore](#)

Like

Be the first of your friends to like this.

As I myself don't smoke and never have I got two of my guest bloggers to try these out for me to see how they fared with 'proper' cigarettes as they have no tar, no tobacco and are 70% cheaper which all in all can only be a good thing.

They both thought that they tasted a bit different in terms of flavour to what they normally smoke which can only be expected but after a while soon adjusted to the taste. They both agreed that the E-Lites provided the nicotine hit, and were loving the fact that there was no tar, tobacco, carbon monoxide, or the additional chemicals found in traditional cigarettes. They were both impressed with the 300-400 vapes per battery charge.

Switching to E-Lites electric cigarettes can save the average smoker 75% compared to tobacco cigarettes, making e-cigs a viable smoking alternative. E-Lites electronic cigarettes also now use the most technologically advanced battery, the G9.

The verdict was they would go for these but they just take a bit of getting used to but they did really like the fact they would be less damaging to their health!

For more details go to www.e-lites.co.uk.
